The impact of a reviewer on a given films box office performance is a matter of debate. Some observers claim that movie marketing in the 2000s is so intense, well-coordinated and well financed that reviewers cannot prevent a poorly written or filmed blockbuster from attaining market success. However, the cataclysmic failure of some heavily promoted films which were harshly reviewed, as well as the unexpected success of critically praised independent films indicates that extreme critical reactions can have considerable influence. Other observers note that positive film reviews have been shown to spark interest in little-known films. Conversely, there have been several films in which film companies have so little confidence that they refuse to give reviewers an advanced viewing to avoid widespread panning of the film. However, this usually backfires, as reviewers are wise to the tactic and warn the public that the film may not be worth seeing and the films often do poorly as a result. Journalist film critics are sometimes called film reviewers. Critics who take a more academic approach to films, through publishing in film journals and writing books about films using film theory or film studies approaches, study how film and filming techniques work, and what effect they have on people. Rather than having their reviews published in newspapers or appearing on television, their articles are published in scholarly journals or up-market magazines. They also tend to be affiliated with colleges or universities as professors or instructors.

Animation : Animation is a technique in which each frame of a film is produced individually, whether generated as a computer graphic, or by photographing a drawn image, or by repeatedly making small changes to a model unit see claymation and stop motion, and then photographing the result with a special animation camera. When the frames are strung

together and the resulting film is viewed at a speed of 16 or more frames per second, there is an illusion of continuous movement due to the phi phenomenon. Generating such a film is very labor-intensive and tedious, though the development of computer animation has greatly sped up the process. Because animation is very time-consuming and often very expensive to produce, the majority of animation for TV and films comes from professional animation studios. However, the field of independent animation has existed at least since the 1950s, with animation being produced by independent studios and sometimes by a single person. Several independent animation producers have gone on to enter the professional animation industry. Limited animation is a way of increasing production and decreasing costs of animation by using short cuts in the animation process. This method was pioneered by UPA and popularized by Hanna-Barbera in the United States, and by Osamu Tezuka in Japan, and adapted by other studios as cartoons moved from movie theaters to television.16 Although most animation studios are now using digital technologies in their productions, there is a specific style of animation that depends on film. Camera-less animation, made famous by film-makers like Norman McLaren, Len Lye, and Stan Brakhage, is painted and drawn directly onto pieces of film, and then run through a projecto

Despite the United States progress on vaccination, spread of Delta variant intensified across the country in July 2021. As children younger than 12 could not be vaccinated for COVID-19, a number of studios announced plans to delay films targeting families or pursue hybrid premium video on-demand PVODstreaming releases126127 on July 31, Paramount Pictures cancelled the release of Clifford the Big Red Dog initially scheduled for September,128 and later rescheduled it for a simultaneous release in theaters and on Paramount+ for November of that year,129 while United Artists Releasings The Addams Family 2 was also shifted to a hybrid release.127130 On August 12, Sony Pictures also delayed the release of Venom: Let There Be Carnage by three weeks to October 15, citing Delta variant.131 On September 1, 2021, Paramount announced that the releases of Jackass Forever, Top Gun: Maverick and Mission: Impossible 7 would be delayed to February 2022, May 2022, and September 2022, respectively, amid surging cases of the Delta Variant.132 On September 6, 2021, however, Sony decided to move up the release date of Venom: Let There be Carnage to October 1, 2021, following the box office success of Shang-Chi and the Legend of the Ten Rings.133 The success of Shang-Chi and the Legend of the Ten Rings also led to The Walt Disney Company deciding to release the rest of their 2021 films exclusively in theaters.134
